ALLIANCE

Carbon Footprinting Workshops

June 3rd
Paso Robles

Hope Family Wines

June 4th
Livingston

E&J Gallo Winery

June 5th
Sonoma

Benziger Family Winery

These **FREE** Carbon Footprinting workshops will provide an overview of a recent California Wine Life Cycle Assessment (LCA) study and help vineyard and winery employees better understand opportunities for reducing Scope 3 Greenhouse Gas emissions (e.g., packaging, energy efficiency that can reduce costs, nitrogen management and transportation/distribution).

The workshops run from 8:30 AM until Noon and will be followed by lunch and an optional winery tour to learn more about sustainability practices in action.

topics to be covered include

- Overview of California Wine's Life Cycle Assessment project and opportunities for reducing carbon footprints at your wineries or vineyards.
- Scope 3 Greenhouse Gas (GHG) updates to the online metrics tool that also tracks Water and Energy use, Scope 1 & 2 GHG emissions, and Applied Nitrogen.
- Best practices for energy efficiency, rebates and incentives; benefits and trends for lightweight or alternative packaging; distribution and transportation options.
