California’s Original Sustainable Winegrowing Program circa 1992
created by Lodi farmers and accredited by world-renowned scientists

Growers must score at least 70% of total points possible to achieve certification

24,129 acres are certified in Lodi
22,679 acres in other California regions
550 acres in Israel
47,358 acres total in 2018

Sustainable winegrowing means farming that is environmentally and socially responsible while remaining economically viable

Over 100 sustainable practices are included in Lodi Rules

Lodi Rules program growth

1,083 certified vineyards

2005 to 2018

304% increase

23% of Lodi’s total winegrape acreage is certified sustainable

Over 30 wineries have wines bearing the Lodi Rules seal

A wine must contain 85% Lodi Rules certified grapes to bear a Lodi Rules seal

Growers receive a bonus of $9.5 million per ton paid in bonuses since 2010
